DAVIDA[®]
MADE IN ENGLAND

Jules, New Brighton, 2005. © Brian Maher/Davida

At Davida we have been defining quality in our own way for more than thirty years. A genuine and relentless pursuit rewarded with a worldwide reputation for the quietest, most comfortable and well made helmets available.

Studs Optional studs for visor/peak (request when ordering).

ECE R22-05
SAFETY STANDARD

Universal Facemask
24070 Black
24071 Brown

We design and manufacture all our helmets at the Davida workshops near Liverpool in England. Our design engineers work hand in hand with our team of technicians to constantly improve quality and performance. Each helmet is individually hand built to precise standards with the manufacturing procedure carefully regulated. Our modern JET helmets maintain the highest standards of quality control required by the ECE R22-05 safety standard certification. All our open face helmets have a fibreglass composite shell and a leather lined interior throughout.

Inspired by our own love of motorcycles we continue to produce our unique and highly distinctive range of hand built, leather lined open face helmets with classic lines and shapes that capture the spirit of motorcycling-adventure and freedom.

Our distinctive range of designs and traditional colours are inspired by the racers and street cultures of the past. Each helmet is individually hand masked and decaled to create each colourway or if desired we offer a bespoke service.

“Not only is the Davida Jet ultra-stylish, it is also a superb fit. I wear it all the time... Your work is inspirational”. Brian Crichton - Associate editor *Classic Bike*. Oct 2004.

The Davida Jet integrates superior fitting, traditional styles and manufacturing into a modern safety product that meets the latest European safety standards; ECE R22-05.

Jet Visor

Bob Health polycarbonate wrap around visor with 5 press studs to fit Davida Jet with 5 studs.

64101 Clear
